EnviroServe Helps US Stainless Products Manufacturer

Dunn, NC – *EnviroServe Chemicals* helps a US stainless steel products manufacturer replace their current chemical process after several years.

EnviroServe Chemicals' new stainless steel cleaning chemicals have been tested for several months and were proven to be superior at lower concentrations! *EnviroServe* custom formulated a product designed specifically for cleaning the heavy duty oils used in deep drawing stainless steel. *EnviroServe's* stainless steel cleaning products have been used very successfully in eliminating many issues that were associated with the cleaning process.

EnviroServe has also extended the bath life in all 8 production washers from 6 week dump cycles to 8 weeks. This will show significant cost savings throughout the year.
