## **EnviroServe Chemicals' Receives Paint Pretreatment Approvals from Caterpillar**

Dunn, NC – *EnviroServe Chemicals* has been granted final approval by CATERPILLAR INC. for two paint pre-treatment systems to their specification 1E4093C – Paint – Pretreatment Chemicals for Metallic Substrates. These are the 3<sup>rd</sup> and 4<sup>th</sup> systems approved by the major Heavy Equipment Manufacturer.

The product/systems are: *EnviroKote 3380 NP* / *EnviroSeal 3303* (Nanotechnology/NCS) for 5 stage washers; and *EnviroPhos 3361* / TAP (Phosphatizing Cleaner/TAP Water) for manual spray.

Our *EnviroKote 3380 NP* is an environmentally friendly Zirconium Pretreatment (nanotechnology) product designed for automated painting operations. This product significantly reduces overall operating costs associated with typical pretreatment products. *EnviroKote 3380 NP* along with our *EnviroSeal 3303* exceeds the specification for pretreatment chemicals for metallic substrates.

*EnviroPhos 3361* is a cleaner/iron phosphate combination product designed for manual paint pretreatment systems. This product also exceeds the CAT specification for pretreatment chemicals for metallic substrates.
