FOR IMMEDIATE RELEASE:

July. 2015

Leading Electrical Component Manufacturer Changes Stamping Lubricant

Dunn, NC – A worldwide leader in electrical enclosures, and component products changes their existing semi-synthetic stamping fluid to *EnviroServe's EnviroDraw™* press lubricant.

After several attempts to eliminate the tacky residue and excessive die wear from a competitive metal forming fluid, this company reached out to *EnviroServe Chemicals*. After a few weeks of testing, expectations were met and full production with the new press lube underwent. Easier cleaning of this press lube was an added bonus for the company's paint line department.

Testing of the paint pretreatment chemicals with this new customer will also begin in weeks to come.

For more information on *EnviroServe Chemicals* contact: 910.892.1791 (main) 910.892.5765 (fax) 603 South Wilson Avenue, Dunn, North Carolina 28339. www.enviroservicechemicals.com. Sales@enviroserviceinc.com.
