

***EnviroServe Chemicals, Inc.***

***Neutral pH De-rusting Products***

- Operating pH 6.5 – 7.0
- Operator Friendlier
- Long Bath Life
- Low Operating Temperature

***We know what it takes:***

***Products, Service, Support, and Equipment***

## ***NEUTRAL DERUSTER***

Our neutral deruster series is the newest technology in rust removal. No longer are strong caustic or acid chemicals needed to remove rust. These products are non-aggressive and they will remove deep rust on all types of mild steel and iron. They are safe on all surfaces and will not harm copper, brass, aluminum, and most other exotic type metals. These products are non-toxic, non-corrosive and biodegradable. They will dissolve rust completely and efficiently while maintaining a pH between 6.5 and 7.0. Our ***EnviroDRust*** products are very efficient, economical and safe to use on parts. All of these products are operator friendly; reducing the amount of hazardous chemicals your employees will be in contact with. The recommended operating temperature for these products is 120 - 140°F. They may be diluted with water at a rate of 10 to 25% by volume, depending on the amount of rust and the amount of time allowed for the de-rusting action.

***NEUTRAL DERUSTERS*** have been used successfully in many different industries such as: agriculture, injection molding, machining, metal forming and stampings, painting and pretreatment, construction, aerospace, automotive maintenance, marine and fishing plus many more!

For further information, recommendations and other regulatory information please refer to the individual Product Data Sheet and Material Safety Data Sheets and/or contact ***EnviroServe Chemicals***.

---

***EnviroServe Chemicals*** also supplies many conventional type de-rusting chemicals as well.

We also have several products that are considered rust converters. These chemicals react with rust and convert it to a paintable black phosphate coating.

---

Find out how ***EnviroServe Chemicals*** can improve your process, reduce your energy costs and provide a better solution for all of your chemical applications.
